MOUNTING INSTRUCTIONS

DO NOT LOCATE THIS THERMOMETER IN DIRECT SUNLIGHT.

The thermometer may be mounted on the left or right of an outside window frame. There are two pins located on the back of the thermometer. Choose the pin that will correctly orient the thermometer in the desired mounting location.

1. Place the large hole in the bracket over the desired pin.
2. Snap the bracket into the locking tabs to side of the pin.
3. Mount the bracket to the window frame with two #6 wood screws.

The thermometer may also be mounted on a flat surface without a bracket by using the hanger located on the back.
