

MESH BAG GUIDELINE

RESIN GRADE:
FDA Compliant

TEMPERATURE:
Melt Temperature: 161°C (363°F)
Softening Point: 152°C (305°F)

Date: 6/28/19

To whom it may concern:

This letter is in response to your request to provide you with information regarding FDA compliance of the following product:

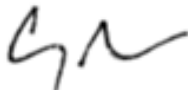

- XN4900

Per the manufacturers of the resin used in the netting of this product, the net will conform to the relevant parts of FDA 21 CFR 175-178 (177.1520) requirements for direct food contact.

This product has passed the USP tests for a Class VI plastic.

Ultimately customers must make their own determination that their use of our product is safe, and technically suitable in their intended applications. Because of possible changes in the law and in regulations, Industrial Netting recommends that customers continuing to use our product verify status every year.

Sincerely,

Corey New
Sales Manager
