FEATURES

- Constructed using FDA compliant gaskets and seals, 304 stainless steel hopper, base and pumps and 303 stainless steel shafts.

- Roll-away depositor allows for easy cleanability and changeover.

- Programmable indexing conveyor and modular pump/nozzle design offers the ability to run a number of different mold layouts and sizes with the same machine.

- Control panel with color touch screen includes four digital temperature controllers for accurate temperature control of hopper sides, base, and hopper air space heater to 275F. UL listing is available.

- Produce pieces weighing 2 grams and up.

- Adapts to most custom silicone, stock silicone, and vacuum formed molds along with blister pack sheets so you aren't locked into special or proprietary molds.

UL listed control panel with stand

HMI touchscreen with PLC based controls

Removeable pump and nozzle assemblies are mounted on a roll away frame for easy cleaning

Jacketed heated hopper holds a capacity of 25L

Programmable indexing conveyor

Machines can be built to your existing mold specifications, standard supplier molds or custom molds with dimentions of up to 11 inches wide and 24 inches long

THE COMPLETE SOLUTION

As a brand of Spec Engineering, CandyWorx offers a complete solution to its customers by pairing the expertise in process design and engineering along with quality custom confectionery equipment based in the United States.
